- Sound card
- USB: Free USB port
- Video card

Dimensions
- Packaging type: Clamshell
- Product dimensions (W x H x D): 31.5 x 80.5 x 15 mm
- Product weight: 0.04 kg

Power
- Battery capacity: 300mAh
- Battery type: LI-Polymer
- Charging time: 4 hr

Product highlights

Voice Recording Function
Voice Recording Function converts your player into a handy dictation machine. Besides playing music or listening to radio, you can also record notes or reminders for work or school, record shopping lists and phone numbers – even song lyrics. By pressing the recording button and speaking into the built-in microphone, voice messages are compressed and stored either in the built-in internal memory or on to the external memory card. Voice Recording Function gives you a highly portable voice recorder allowing you to record anything, anytime and anywhere!

Direct USB
Devices with direct USB can be plugged directly into the USB port of your PC without the need for any cables. Your computer will automatically recognise the device as a removable USB mass storage device (Windows 98 requires additional drivers) allowing you to easily drag and drop files via Windows Explorer (or Apple Folders) between your computer and device.

Two-colour OLED display
2-colour OLED display offers colour combination (e.g. yellow and blue) in a super-bright display and also allows for animation. This makes for easier reading of the display, and for fun sharing with friends

Equalizer
Equaliser allows you to select preset modes that optimise certain frequency bands to enhance specific music styles. Players with Equaliser, utilise graphic equalising technology to automatically set the optimum sound frequency balance for a chosen music style. The Equaliser allows you to enjoy the optimum sound depending on the music style.
